Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 March 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 18-23, drawn to a method and system for using a decision engine to adjust parameter values of a financial account, classified in class 705, subclass 38.
- II. Claims 8-14, drawn to a method and system for adjusting parameter values for a financial account, classified in class 705, subclass 35.
- III. Claims 15-17 and 24-26, drawn to a method and system for using a decision engine to adjust parameter values for a plurality of financial accounts, classified in class 705, subclass 39.

The following inventions are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable.

Inventions I and II: In the instant case, subcombination II has separate utility such as performing a second table lookup in the second lookup table using the set of second account attributes, the second table lookup returning a result indicating whether the first method override is to be applied to the financial account; and based on the result, updating the record of the financial account to cause the first method override to be applied to the financial account. See MPEP § 806.05(d).

Inventions I and III: In the instant case, subcombination III has separate utility such as an account selection module configured to select one of the plurality of financial accounts; and a decision engine configured to communicate with the first data store, the second data store, and the account selection module, the decision engine configured to retrieve the decision rules from the second data store and the account history information for the selected financial account from the first data store, to determine based on the decision rules and the account history information whether a method override should be applied to the selected financial account, and to apply the method override to the selected financial account. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their

Art Unit: 3693

recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The examiner has not contacted the applicant for election over telephone due to the complex nature of the election/restriction requirement (see MPEP §812.01 (R-3)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sara Chandler whose telephone number is 571-272-1186. The examiner can normally be reached on 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Kramer can be reached on 571-272-6783. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
